40	26.055	26.505	26.955	27.405	27.855	26	28.305		28.755	40

Points to note: Channels marked in red are Alpha frequencies and can be obtained by using a 20KHz shift. Please note that these channels are often used by radio control models and other similar devices.

The small channel numbers in pink represent the equivalent UK 27/81 channels. They are displayed above for the purpose of aiding conversion and can be obtained by using a 1.2KHz shift instead of the usual 5KHz one.
